

```
public class ExampleUnitTest {  
    @Test  
    public void addition_isCorrect() throws Exception {  
        assertEquals(4, 2 + 2);  
    }  
  
    @Test  
    public void test01() throws InterruptedException {  
        .....  
        Observable.just(200)  
            .subscribeOn(Schedulers.newThread())  
            .subscribe(begin.asAction());  
        begin.set(200);  
        Thread.sleep(1000);  
        assertEquals(beginTime.get(), "200");  
        .....  
    }  
    .....  
}
```
